We acknowledge the First Nations peoples as the Traditional Owners and Custodians of the lands, waterways and skies of the Murray-Darling Basin. We respect their continuing connection to culture and Country, and we thank them for their knowledge and science and the values reflected in these data.

CEWO Murray-Darling Basin valley boundaries

Dataset name	CEWO_MDB_Valleys		
Dataset citation	CEWO Flow-MER (2022) CEWO Murray-Darling Basin valley boundaries. Flow-MER Program. Commonwealth Environmental Water Office, Australian Government Department of Climate Change, Energy, the Environment and Water. Sourced from https://data.gov.au/data/dataset/cewo-mdb-valleys on [date-sourced].		
Description	Spatial data set of valley boundaries in the Murray-Darling Basin used to support the Commonwealth Environmental Water Office's (CEWO) monitoring, evaluation and research activities. Modified from the Sustainable Rivers Audit (SRA) valleys to partition the Selected Areas used in the Long Term Intervention Monitoring (LTIM) project and Flow-MER program and to align with water accounting in the Basin.		
Currency	**Date from:** 1/7/2014		
	Date to: 30/11/2022		
Spatial domain	**Jurisdiction/Location:** Murray-Darling Basin		
	Geographic extent: -24.586 138.568 152.489 -37.682		
	Coordinate system: GDA1994, EPSG 4283		
Dataset status	**Progress:** Complete		
	Maintenance and update frequency: May be updated within the life of the Flow-MER project if new areas are watered		
Attributes	**Attribute Name**	**Data Type**	**Description**
	ValleyName	text	Name of the Valley
	ValleyID	text	Integer identifier for each Valley
	Area_km2	number	Area in square kilometres
	Hectares	number	Area in Hectares (Albers)
	ValleyCode	text	3 letter unique abbreviation of ValleyName
Data quality	**Lineage:** Based on the Sustainable Rivers Audit (SRA) valleys Hand edited at the start of the CEWO Long Term Intervention Mointoring (LTIM) project to delimit the Edward-Wakool LTIM selected Area and to provide separation of northern and southern Basin. Adjusted during the LTIM project to align with water accounting in the Basin and observed patterns of inundation. Coorong, Lower Lakes and Murray Mouth (CLLMM) identified as a separate region in 2021 to permit separate analysis of the CLLMM region within the Flow-MER Ecosystem Diversity evaluation.		
	Positional accuracy: Not assessed		
	Attribute accuracy: Good		
	Logical consistency: GIS processing to ensure no overlapping polygons and complete alignment of polygon boundaries for adjacent catchments..		
	Completeness: Complete representation of the Murray-Darling Basin
